

Replacement Parts

We are pleased to provide an overview of parts and services Composittech supplies. We welcome your site-specific inquiries as we regularly design innovative solutions to improve filter performance for our customers.

Design and Engineering

Composittech is dedicated to supplying quality industrial filtration systems manufactured with decreased production costs, higher product quality, and increased efficiency. In the current economic climate, we realize it is important to address both cost savings and the regulatory environment. Our engineering team at Composittech is constantly seeking ways to improve our filtration equipment & industrial filtration solutions in production with our filter designs while also achieving compliance with the ever changing governmental regulations.

Productivity and Solutions

Composittech Products Manufacturing is the world's leading separation experts, with the deepest knowledge, broadest technical resources, and most comprehensive service solutions. For more than 30 years, we have helped our customers respond to the world's environmental, energy-resource, and nutrition challenges by leveraging our extensive knowledge to create, develop, implement, and service innovative separation solutions. By solving these fundamental challenges, we create lasting value and drive growth across every industry we serve.

Service and Repair

Composittech has been providing filtration equipment servicing for more than 30 years to industrial and municipalities in the USA and globally. Composittech's facility in Pearland, Texas is conveniently located in the heart of the petrochemicals industry and our technicians are available to make site visits as well as repairs. We have a field crew trained in inspection of filtration equipment and preventive maintenance as well as on-site parts installation and rebuild and repair services. Composittech's capabilities have increased constantly with the design of new and improved products for our customers including replacement parts for most brands of filtration equipment.

It is our mission to continually develop improved products and to provide parts and installation in a timely and cost-effective manner with a service standard unequaled in the filtration industry.

Filtration Services

Inspection

Preventive Maintenance can lengthen the life of your equipment as well as save time, and money in unexpected repairs and equipment downtime. Our technical staff offers inspection services in addition to your regularly scheduled maintenance.

Compositech service personnel are experienced technicians that can perform a detailed inspection of your equipment and provide a written report which will pinpoint areas of concern. Whenever possible, we also provide on-site repairs. Give us a call today to schedule a visual inspection (281) 648-3557.

On-site Repair/Rebuild

Rebuild and Repair services are offered and can be scheduled at your regular turnaround time. Our service technicians can quickly perform routine maintenance at your plant. In addition to saving man hours, these services result in an overall savings in terms of the lifespan of your machinery.

Refurbishment Services

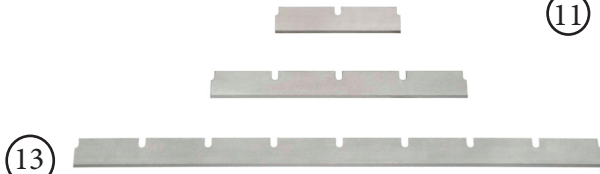

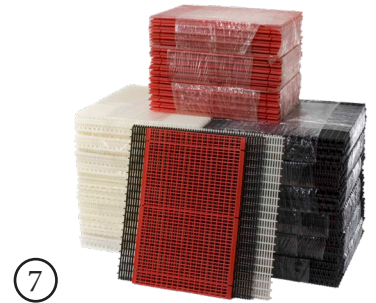

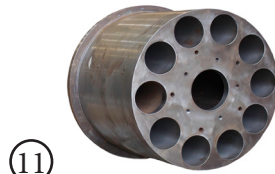

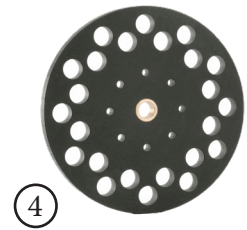

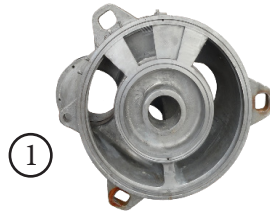

Complete filter refurbishment is available for longer wear life at a substantial savings to your company. We can reengineer your old equipment to "like new" condition, upgrading and rebuilding your machinery at our facilities or yours. We are always on the lookout for quality used equipment which we can offer as a refurbish alternative to a larger capital investment project for our customers as available. Our technical teams are also available to install reconditioned equipment at your location.

In addition to our lines of filtration equipment, Compositech manufactures replacement parts for Ahlstrom, Alar, Ametek, Andritz, Ashbrook, Beloit-Jones™, Carter, Celleco™, Dorr-Oliver®, Eimco™, Envirex, Enviroquip, Filtres Philippe, IMPCO™, Komline-Sanderson®, Pannevis, Parkson, Peterson, Sernagiotto/SernaTech, Westech, US Filter, and most other filter brands. Our goal in manufacturing filter replacement parts is to offer upgrades to filter performance and reliability. Our parts meet vigorous standards for quality and durability and are designed to offer increased filter performance and lower maintenance costs.

Rotary Vacuum Drum Parts

EVERYTHING can be modified to meet our customer's specific chemical, thermal, and abrasive requirements.

1. Filter Valves
2. Rollers
3. Agitators
4. Wear Plates
5. Worm Gears
6. Replacement Drums
7. Drainage Grids
8. Worms
9. Drum Rebuilds
10. Division Strips
11. Trunnions
12. Replacement Tanks
13. Scraper Blades
14. Bushings
15. Bearing Housings
16. Belt Discharge Systems
17. Bearings
18. Bearing Liners
19. Edgetrackers

Disc Filter and Save-all Parts

EVERYTHING can be modified to meet our customer's specific chemical, thermal, and abrasive requirements.

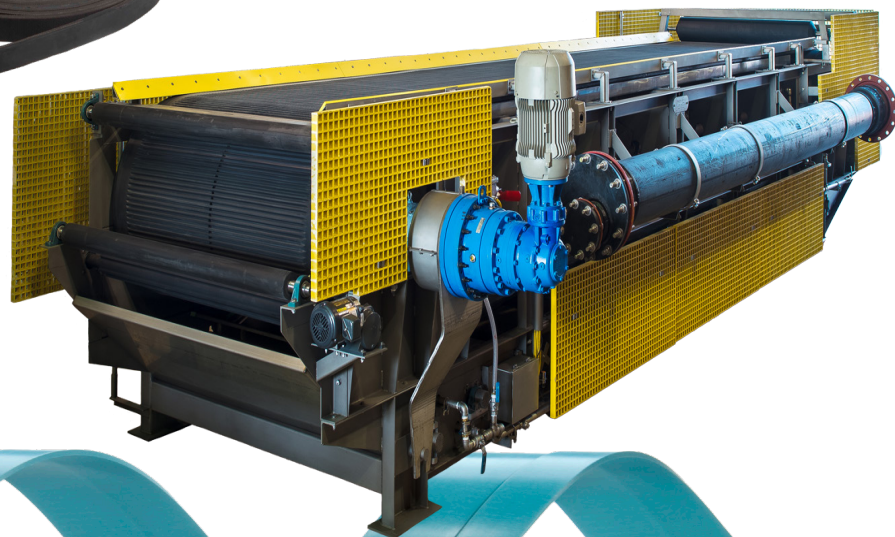

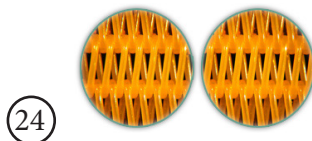

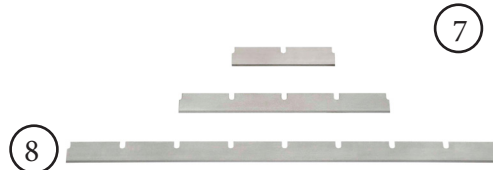

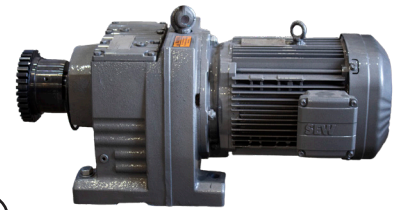

1. Sectors/Sector Covers
2. Worms/Worm Gears
3. Filter Valves
4. Sector Clamps
5. Screw Conveyors
6. Scraper Blades
7. Radial Rods
8. Stuffing Boxes
9. Replacement Centershafts
10. Ferrules
11. Agitator Paddles
12. Replacement Tanks
13. Bridge Plates
14. Wear Plates
15. Filtrate Tubes
16. Scraper Aprons
17. Bearings
18. Multi-flex Connectors
19. Trunnions

Horizontal Belt Filter Parts

EVERYTHING can be modified to meet our customer's specific chemical, thermal, and abrasive requirements.

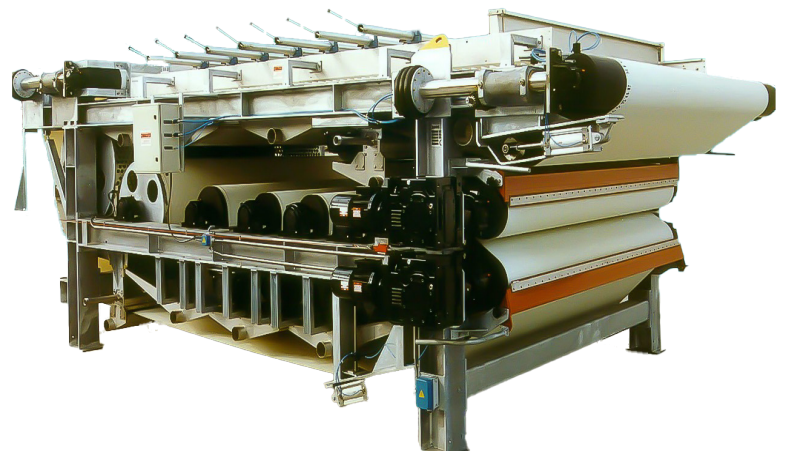

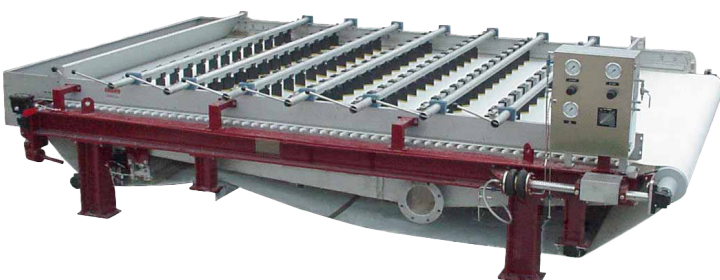

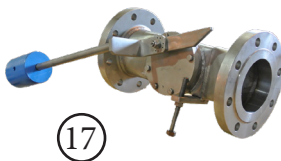

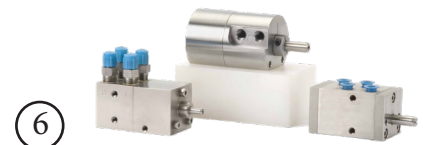

1. Rubber Drainage Belts
2. Rollers
3. Replacement Frames
4. Tail Pulleys
5. Head Pulleys
6. Support Decks
7. Filter Drives
8. Scrapers
9. Wash Boxes
10. Vacuum Pans
11. Teflon End Seals
12. Turcon™ Wear Strips
13. Feed Levelers
14. Aligning Rollers
15. Lip Supports
16. Deckles & Seals
17. Support Rollers
18. Cloth Aligning Assemblies
19. Feed Distributors
20. Bearings
21. Slide Strips
22. Edgetracker
23. Wear belts
24. Filter Cloth

Belt Press Filter and Gravity Table Parts

EVERYTHING can be modified to meet our customer's specific chemical, thermal, and abrasive requirements.

1. New & Used Equipment
2. Plows
3. Rollers
4. Polymer Systems
5. Scraper Blades
6. Steering/Tension Valves
7. Tracking Systems
8. Seals
9. Shower Nozzle Assembly
10. Doctor blades
11. Belt Tracking
12. Cylinders
13. Bellows
14. Tracking Paddles
15. Filter Belts
16. Bearings
17. Venturi mixer

Services

In-Plant Services for all Filters

- Drainage Belt Installation
- Save-All Sector Installation
- Filter Rebuilds
- Belt Press Rebuilds
- Center Shaft Installations
- Agitator Installations
- Preventative Maintenance Contracts
- Belt change outs
- Gravity Grid Strip replacement
- Bearing servicing
- Roller Replacement
- Onsite rebuilds
- Demolition of equipment

Consulting Services

- Operations Training
- Maintenance Training
- Performance Evaluations
- Performance Upgrade Recommendations
- Troubleshooting
- Installation Assistance
- Belt Press, Horizontal Belt Filter, Rotary Drum, Disc Filter, Gravity Table, Performance Inspection
- Belt Tracking issues
- Process issues
- Over the phone Technical Support for any questions the customer might have about our provided services.
